Real-World Phishing Simulation and Security Awareness Training

“ 54% of small to medium sized business' surveyed pointed to a negligent employee or contractor as the root cause of a data breach their business experienced. ”

– Ponemon Institute

PhishLine, powered by Barracuda

Our offering of this solution helps safeguard you or your business through interactive phishing simulation and email security awareness training for your employees. Through this service, we can teach your employees how to spot, avoid, and report real-world attacks. All of this helps protect your company and employees.

What's Included:

Monthly Security Awareness Training Campaigns

PhishLine's real-world multivariable testing creates mock-phishing campaigns that mimic today's threats. This illustrates to your employees (and you) where their vulnerabilities are, and to become more informed about how to minimize their risk. The interactive campaigns use a mix of links, Smart Attachments, videos, graphics, and training materials to create impactful educational experiences.

Robust Reporting

Get regular monthly insight into who's clicking on what, which will help you identify the levels of risk within your employees.

What to Expect

Our team will create and execute monthly phishing/email security awareness campaigns and provide regular activity reports. At that time, you will simply make sure we have your most recent employee email list for those individuals you would like to receive the monthly campaigns.
